**Subject:** Early Information for the Mine Rehabilitation & Closure Planning Summit

Email not displaying properly? [View it on your browser](#)

Dear Colleague,

Millions of dollars and environmental and community impacts are at stake during the mine rehabilitation and closure process. Furthermore, mine operators also face a tough regulatory environment that is in constant change on both the federal and state levels. Considering these factors it becomes clear that your rehabilitation and closure plan must be well executed in order to limit both long-term monetary liabilities and negative environmental impacts.

IQPC's **Mine Rehabilitation & Closure Planning Summit** will examine pressing issues that you and your colleagues are faced with such as **Reclamation, Acid Rock Drainage, Risk Management, Bonding, Community Planning, Regulations, Permitting, Pit Lakes, Tailings**, and many more. You will have the chance to benchmark against several of your peer and competitive organizations through workshops, case studies, interactive panel discussions and vertical networking sessions.

Join us **November 18-19 in Las Vegas, NV** to network with and gain perspective from industry leaders such as **Roger Funston**, Environmental Manager, **Kinross Gold**, and **Tom Williams**, VP Environmental Affairs, **Midway Gold**.

***Register for the summit by Friday, August 9th to lock in the low 2012 Mining price point!***

For more information, visit **[www.MineRehabSummit.com](http://www.MineRehabSummit.com)** today.

Kind Regards,

Jason Zimmermann  
Conference Director  
IQPC New York
